Eric,

Unfortunately the radon specialist can only make it at 8:00 AM on Friday, August 11, 2017 for the drop off. He has another appointment at 10:00AM at a location which is an hour's drive from Lewiston, NY. Please consider rescheduling with the property owner.

We have also sent an email to Accuvue to check their availability for Wednesday and Saturday, if that is an option you want to consider.

Please let me know your thoughts.

Thanks,

Ben Nwosu

Hi. I just got off the phone with the property owner and 10 am would be best. Please confirm drop on Friday and pick up on Monday at 10 am.

Thanks

Eric,

Please can you confirm what time the property owner at 738 UMR will be available for drop off and pick up. The radon specialist has indicated a tight schedule on Friday 8/11/17, but is willing to work with us.

Patrick and Chad will provide specifics for slag analytical and radon shortly. Please note that the slag analysis is a special analysis. We will not be grinding the whole sample as the normal

process would require. The slag in each bag is a specific type. So the lab can take one piece and run the gamma. On piece to prep for alpha spec. Another piece to run metals.

Good morning Eric,

Please confirm how many radon canisters you would like us request for the sampling event.

Thanks,

Ben Nwosu

Subject: NFB slag samples & 738 UMR survey/radon

Good Morning:

Lyndsey and I were at the site until 8pm last night. We will be there by 830am.

There are a few items we should try or need to address this week.

NFB slag pieces-analytical

Chad please figure out how many samples we have to send out and work with Patrick and Ben to set up analytical with Eberline. All the same rad parameters as well as metals. Hopefully we can get that done in time to ship before Friday.

738 UMR

We have pushed this aside but we need to perform an indoor gamma scan. We can conduct with the 2x2 NaI. We also need to run a radon canister. Please contact Accuvue and see if Tick can drop on Friday. The catch there would be pickup on Monday. If Petes available I would ask him to be there for pickup as first option. If not I would see if Morgan has Weston personnel that could be there for pickup. Lastly I would see if one of our Weston could stay until Monday.

Please start working on this and let me know if all this is feasible. If Friday can be the day, I will meet with property owner prior and speak about the current situation with our program's funding and set up times for Friday's gamma survey and radon drop.
